HEINEHARD

PRODUCTS

IMPACT CRUSHER BLOWBARS

Derwent Industries manufacture a wide range of blow bars for Horizontal Shaft Impactors. They are manufactured in a wide range of alloys to suit your service application. Blow bar designs can be modified to prolong wear life. Heinehard alloy range include Manganese, Martensitic, Martensitic ceramic, Chrome Iron & Chrome Ceramic.

VERTICAL SHAFT IMPACTOR PARTS

A wide range Vertical shaft impact crusher parts are supplied for all different models of Canica & Cedarapids machines. Items such as Anvils, Impeller Shoes, Distributor plates, Lid liners, Edge Liners and Feed tubes in our proprietary Chrome Iron grade are just some of the items that Derwent provides.

IMPACTOR WEAR TILES, LID LINERS AND IMPACT PLATES

Wear tiles on crusher walls along with lid liners are manufactured to suit a variety of impact crushers. Replaceable Apron Impact plates are manufactured along with grinding paths for the crushing chamber.

MOBILE IMPACT CRUSHER PARTS

Blow bars, Apron tiles, breaker bars, impact plates can be supplied for the latest mobile impact crushers range such as Kleemann, Finlay, Powerscreen, Sandvik & Nordberg. Alloys from our Heinehard range include Manganese, Martensitic, Martensitic Ceramic, Chrome Iron and Chrome Ceramic.

HAMMER MILL PARTS.

Various hammer mill components are supplied to match your service requirements.

Alloys include Manganese and low alloy steel due to machines impact requirements.

JAW CRUSHER PARTS

Derwent supplies a large variety of jaw crusher parts such as swing, fixed jaws along with upper and lower side wall cheek plates. Jaw Plates are manufactured in 18% & 22% Manganese steel along with our latest technology Ti Carbide inserts to substantially enhance service life.

CONE CRUSHER PARTS

Cone crusher parts such as Concave and Mantles are supplied to match your machine type.

Concaves and Mantles are supplied in fine, medium, or coarse grades pending your application. Alloy types are 18 & 22% manganese steel with the Titanium carbide inserts now being applied to the larger cone crushers to increase service life.
